Mounting TANK-SPION CLASSIC

- The TANK-SPION CLASSIC is a tank level displaying unit for plastic oil tanks.
- Mounting at one of the rear tanks has to be performed as shown in the following mounting steps. Refer to figures below.
- The TANK-SPION CLASSIC is a complete retrofitting set.

(1) Clear the tank surface

(2) Apply the special glue and affix the attachment part on the tank surface.

(3) Drill a 3 mm hole into the tank surface.

(4) Adjust the scale corresponding to the tank height:
Floater at ground level => displayed value is 0

- (5) Pull through the filament and mount the floater at the filament.
Sink the floater to the bottom of the tank.

- (6) Screw the displaying unit into the affixed attachment part.
Set the scale to the current level.

(7) The mounted TANK-SPION CLASSIC shows the current tank level in cm scale units.
