

Mounting TANK-SPION CLASSIC

- The TANK-SPION CLASSIC is a tank level displaying unit for plastic heating oil tanks.
- Mounting at one of the rear tanks has to be done in the following mounting steps. Refer to figures below.
- The TANK-SPION CLASSIC ist ein a complete retrofitting set.

(1) Clear the tank surface

(2) Pile on the 2-components adhesive on the attachment part.
Then affix the attachment part on the tank surface.

(3) Drill a small hole in tank surface by using the 3 mm borer.

(4) Adjust the scale corresponding to the tank height:
Floater at bottom level => displaying zero value.

- (5) Pull through the filament. Mount the floater at the filament.
Sink the floater to the bottom of the tank.

- (6) Screw the displaying unit into the affixed attachment part.

(7) The mounted TANK-SPION CLASSIC shows the current tank level in cm scale units.
