

## Electronic Tank Measurement Unit **LX-2**

Display unit LX-2 [ Art.No. 11032 ]

LX-2 Set [ Art.No. 12032 ]  
( Display unit + Level probe TDS-6020 )

The unit **LX-2** is a professional display unit for measurement of oil tanks and other containers.

The **LX-2** Set consists of a hydrostatic level probe and a digital display unit.

The signal wire connecting of the level probe to the display unit may be up to 100 m long.

Programming and set-up will be done by menu selections with three push buttons.

### Typical Applications:

- Oil tanks
- Storage tanks
- Tanks at petrol stations
- Water tanks or reservoirs

The display unit can display

- litres
- centimetres of level
- or percent

### Liquids:

Diesel, heating oil, biodiesel, plant oil, palm oil, water, lubricating oil, AdBlue, or other.

Gasoline: Gasoline tanks require an EEx level probe.

### Available tank measure probes:

with different precision the following probe types are applicable:

- TDS-60xx ( low cost )
- TDS-70xx ( precise and lean, d = 22 mm )
- TDS-80xx ( precise and robust, d = 40mm )
- TDS-80xx-EEx ( for gasoline tanks and for explosive areas )
